

5-day Winter School

on

Globalization, Development, and Gender – Female Leadership, Organisational Structure, and Performance

About the Winter School

IIT Roorkee, in collaboration with Lancaster University, Birmingham University (United Kingdom), and NIT Rourkela, sponsored by SPARC under the Ministry of Education, GoI is organizing a 5-day winter school on “Globalization, Development, Gender – Female Leadership, Organisational Structure, and Performance” from 13-17 January 2025 in the dept. of Humanities and Social Sciences, IIT Roorkee, Uttarakhand. This program facilitates participants to attend a 1-day policy workshop on the 13th January which will feature academics from reputed Indian universities/organisations such as Ashoka, IIM, Azim Premji, Shiv Nadar and experts from World Bank, Good Business Labs, CII, IWWAGE, and Ministries, etc. This training module aims to equip participants with the essential practical skills and methodology to meet the demand for analyzing firm level data with special reference to trade and role of gender in firm performance. It will also allow the participants to interact with the various national and international experts.

Brief Contents

The course aims to provide a condensed understanding of economic processes that shape the contemporary global world and their gendered outcomes. It considers new theoretical approaches and tools to analyze the impact of globalization on development, with special reference to firm performance and how gender diversity matters for firm performance. Emphasis will be placed on the analysis of different aspects of changes in market structure, and how these changes in market structure can influence labour, work and employment patterns, economic restructuring, and critical policy issues among others.

This course will provide scholars with a thorough knowledge of key interconnected literature - globalization, labour markets, and gender. Efficient functioning of labour markets and higher participation of women in the labour markets are two key challenges for overall development of an economy, especially like India. We will deliver a course, which will bind all these three aspects that are intertwined in the current global scenario.

The first part of the course will focus on the basic and contemporary theories of globalization and development. We will analyze how globalization can affect firm performance and how certain firms are different from others; how globalization can affect labour markets with a special reference to gender diversity; how gender diversity can make a difference in firm performance or not, etc. Specific reference would be made to the global division of labour, employment, etc. and their implications for gender inequalities.

The second half of the course would focus on the policies and practices in the field of gender and international development. The course would outline key contributions to the public policy making processes through empirical papers studying the link between gender and economic development focusing on microfinance, social protection, gender quotas, etc.

Expert List (Policy Workshop on 13th January)

- Mitali Nikore – World Bank, Delhi and Founder, Nikore Associates
- Sona Mitra – Director, Policy, and Research, IWWAGE, Delhi
